

Figure 1 : Cah Nuts Wireframe [Source](#)

You have been approached by Cah Nuts Limited to create a web-page. The company specializes in the export of cashew nuts from the Kenya. They have no ICT department but they have an idea of the layout they would like for their web-page(see figure 1 above).

Requirements:

1. Using HTML structural elements create the index page for Cahnuts.
2. Generate dummy content [here](#)
3. Include ALL references to materials used from online sources.
4. You are expected to document each line of your markup and CSS indicating what it means.
5. Be as creative as possible :)

*NB : In case you need to brush up on concepts, please refer to the Google classroom and also the github class exercise repository.*
